### **About ASPIRE2013: The Carnarvon Astrofest, Science and Innovation Festival.**

This is the largest science themed festival held in the Gascoyne region and will headline Dr Karl on Sunday 8th September at the Carnarvon Civic Centre. It merges the efforts of the successful 'Carnarvon Astrofest' and the 'Carnarvon Science and Innovation Festival'. This unity is bringing together over 15 groups including those from each level of government, international and state corporations, secondary school students, teachers and university science demonstrators, small innovative start-ups and larger partners. The Science Scholarships Program is a stand-out initiative that support the aspirations of students of all ages who are actively pursuing their interests and careers in science, maths or engineering studies. Applications available from Friday 26 July at Shire offices and Libraries throughout the Gascoyne or online at [www.carnarvonaspire.net](http://www.carnarvonaspire.net)

### **Upcoming ASPIRE 2013 Events**
